

VIGNESH MUTHU ARUMUGAM

Product Designer | UX Designer

Chennai | +91 9344148837 | vigneshmuthu.arumugam@gmail.com | linkedin.com/in/vigneshmuthua | vigneshmuthu.me

PROFESSIONAL SUMMARY

Product Designer with an M.Des in Product Design and 4+ years of experience leading end-to-end UX for digital and hybrid products, from discovery through delivery. Skilled at understanding business requirements and translating them into clear design outcomes running UX audits, driving user research, and building accessible, scalable design systems along the way. Has adopted generative AI to enhance the design workflow, using it to synthesize research and support sharper decision-making. Leads design strategy, guides cross-functional collaboration, and turns user pattern into measurable product improvements.

SKILLS

Design: UX Design, UI Design, Interaction Design, Motion Design, Rapid Prototyping, Wireframing, Visual Design, Design Systems, System Design, Inclusive Design, Accessibility (WCAG 2.1), Data Visualization, Branding

UX Leadership & Strategy: UX Audits, Business Requirement Analysis, Outcome-Driven Design, Design Strategy, Design Critique & Mentorship, Stakeholder Alignment, Cross-Functional Collaboration

Gen AI: AI-Assisted Design & Development Workflows (Claude Code, Codex, Cursor), AI-Powered Research Synthesis (Dovetail, NotebookLM), Conversational UX, Designing for AI Interfaces, Google PAIR Guidebook, Gemini API, MCP & Design Token Integration, Prompt UX, Human-Centered AI

Research: User Research, A/B Testing, Design Thinking, Heuristic Evaluation, Usability Testing, Journey Mapping, Storyboarding, Competitive Benchmarking, Information Architecture, Project Management

Tools: Figma, Adobe Creative Suite (Photoshop, Illustrator, After Effects, Premiere Pro), Sketch, Rive, Hotjar, Miro, FigJam, Blender, Cinema 4D, Keyshot, Procreate, Jira, Notion

PROFESSIONAL EXPERIENCE

Product Designer II

06/2024 – 07/2026

Microgate Technologies Private Limited | Hyderabad

- Led end-to-end UX for enterprise product features, translating business requirements into clear design outcomes across user flows, wireframes, high-fidelity UI, and interactive prototypes, resulting in a 28% improvement in task completion rates.
- Acted as Head of Product Design for the Chiltier project, owning the complete design of a hybrid physical and digital product, including system design and seamless interaction between physical and digital interfaces.
- Ran UX audits and applied research methodologies including usability testing and stakeholder workshops to gather insights and translate findings into actionable design improvements, reducing design iteration cycles by 35%.
- Designed and maintained design system components aligned with accessibility standards and inclusive design principles, reducing front-end rework by 40%.
- Adopted generative AI tools to accelerate prototyping and design-to-code workflows, using Dovetail and NotebookLM to synthesize qualitative research faster, while collaborating cross-functionally to keep UX strategy aligned with business goals.

Product Design Intern

05/2023 – 12/2023

Designart Design Studio | Chennai

- Undertaken as part of the M.Des curriculum; designed Vehicle HMI Dashboards by analyzing user needs and creating optimized digital interfaces for automotive systems.
- Created wireframes, interactive prototypes, and high-fidelity user interfaces focused on improving usability and information hierarchy.
- Applied design thinking and iterative prototyping to enhance the overall user experience of complex vehicle data displays.

Product Designer

06/2020 – 05/2022

Proventus Business Solutions Pvt Ltd | Bengaluru

- Conducted user research and usability testing to understand target user behavior and improve digital product experiences.
- Created low- to mid-fidelity prototypes and wireframes that contributed to an 18% improvement in usability test scores.
- Collaborated with cross-functional teams to translate user needs into clear, user-centered design solutions.

EDUCATION

M.Des — Product Design — Indian Institute of Information Technology, Design & Manufacturing

2022 – 2024

B.E. — Mechanical Engineering — Panimalar Institute of Technology

2016 – 2020

ACHIEVEMENTS & AWARDS

Excellent Award — Microgate Technologies (Oct 2024, Jul 2025)

- Top Impactor — Microgate Technologies (Dec 2025)
